

**...Rainbow Trout Season**

*(Continued from previous page)*

TPWD manages 18 Neighborhood Fishin' lakes statewide in most major urban centers, including Austin, Dallas-Fort Worth, Houston and San Antonio. These lakes are stocked with rainbow trout every two weeks and offer plenty of amenities so that family members of all ages can enjoy a fun and relaxing day fishing and connecting in nature.

Families looking to spend a day or weekend exploring a Texas State Park can add fishing to their list of activities, as more than 15 state parks throughout the state will receive periodic stockings of rainbow trout this

winter. Many state parks offer excellent fishing amenities such as fishing piers and shoreline access, cleaning stations, and equipment rentals for tackle and kayaks or canoes. As a bonus, state parks are the only locations in Texas that anglers can fish for free without a fishing license.

For anglers interested in tailrace fishing, TPWD will be stocking rainbow trout below several dams and spillways, which often have very cool water and provide excellent conditions for trout fishing. This year, TPWD will stock rainbow trout into the Canyon Tailrace on the Guadalupe River below Canyon Lake, the Lewisville Tailrace located on the Elm Fork of the Trinity River below Lake

Lewisville, and the Possum Kingdom Tailrace on the Brazos River below Possum Kingdom Lake.

Other stocking locations include dozens of local city and county managed park ponds, the Texas Freshwater Fisheries Center casting pond, and several rivers including the Frio, South Llano and Guadalupe rivers and the Clear Fork of the Trinity River.

Rainbow trout can be caught on a variety of baits and lures. Depending on an angler's experience level and interest, they can be caught using simple, light tackle or on hand-tied flies using a fly rod. Other tips to consider when trout fishing include arriving early to stocking

sites on stocking days, maintaining a safe and courteous distance from fellow anglers, keeping an array of baits and lures nearby and having ice available when harvesting trout to keep fish fresh.

TPWD will be stocking a total of 343,650 rainbow trout in Texas from Nov. 26 through the beginning of March. Because rainbow trout are unable to survive in Texas after the winter, anglers are encouraged to keep up to their daily bag limit of five trout. Rainbow trout are an attractive, tasty fish found on many restaurant menus, and anglers can easily find recipes to prepare these fish online.

In Texas, children under 17 fish

for free, but a fishing license with a freshwater fishing endorsement is required for adults in the family. An angler fishing in a Community Fishing Lake or from a dock, pier or jetty within a Texas State Park may use no more than two poles. The statewide bag limit is five trout, except on parts of the Guadalupe River where special limits are in effect.

The dates and locations are subject to change due to inclement weather or other unforeseen circumstances. Be sure to check the 2019-20 Trout Stocking Schedule online before you go fishing to confirm the stocking date, check fishing regulations and to find other winter trout stocking program angling tips.

# Water Weekly

For the week of 11/18/19

## Water conditions

The latest drought map for conditions as of November 12 shows improvement for the fourth consecutive week. Moderate or worse drought conditions now impact 32 percent of the state, the lowest value in three months. Extreme drought now impacts less than one percent of the state.

### Drought conditions

- ◆ 32% now
- ◆ 41% a week ago
- ◆ 22% three months ago
- ◆ 1% a year ago

## Drought change in the last month

In mid-October 2019, moderate or worse drought covered half the state. Extreme drought impacted 9 percent of the state. Since that time, cooler and wetter conditions have brought welcome relief. Drought areas to the east of the I-35 corridor have generally seen more improvement than those to the west.
