STARBASE Project! The Bronte Elementary 5th grade class was given the privilege of attending the STARBASE Project at Goodfellow Air Force Base in San Angelo for five consecutive days. They were instructed by great teachers, Ms. Camron and Mrs. Rocha, along with a few fun lesson times from Mr. Maddox. This was an amazing learning experience that each student thoroughly enjoyed. The students were completely enthralled for five hours each day with STEM activities. They learned how to program a robot, create a tag for a 3D printer to make, test, and calculate density, saving Fred by following a "hands off" rule, doing a computer program-based scavenger hunt, completing a mystery fluid lab, exploring Newton's Laws of Motion, building gliders, and making an egg friendly space shuttle. There were so many more lessons and overall this ranked above 10 from each student's perspective. This definitely inspired the students to enjoy all four areas of STEM: Science, Technology, Engineering, and Mathematics. The 5th grade class earned the first ever "Outstanding Class" award and were presented with this on the final day. Billy Bannert (above left photo) was awarded the "Best STARBASE Patch" for designing an amazing one. The 5th grade class appreciates Goodfellow Air Force Base, the STARBASE staff, the director Mr Longoria who invited the school, the outstanding teachers, and Bronte ISD for allowing the students to attend. Learning was top notch for each student and their sponsor teacher had a phenomenal time too.

School Menu
