... Online Program

(Continued from page 2) was one of the first NRCS producers to adopt the Conservation Client Gateway technology.

"The ability to use this website and to go online and find the forms and make things happen that way allows me to save in many cases 280 miles, which is a lot of time and with the gas prices the way they were, a lot of money, so there is a significant savings monetarily and timewise from it," says Castello. "The other part is it allows me to get things done quicker and frankly more accurately because it's on paper and we know what we are trying to go do."

Castello farms in Fayette County, but lives near Houston and travels for work. He has found that using Conservation Client Gateway not only saves him time and money, but when he travels it allows him to sign paperwork on the go, to access his conservation plans and financial contracts and track payments easily. He can also message the local office if he has questions or needs to set up an appointment during times that he will be at the farm.

For more information about Conservation Client Gateway, visit your NRCS office at your local USDA Service Center or visit <http://www.nrcs.usda.gov/wps/portal/nrcs/main/national/cgate>.

... Council Minutes
