TEXAS COMMISSION ON ENVIRONMENTAL QUALITY

Consolidated Notice of Receipt of Application and Intent to Obtain Permit and Notice of Application and Preliminary Decision

Air Quality Standard Permit for Concrete Batch Plants Proposed Registration No. 148706L004

Application. Concrete Mobility, LLC, has applied to the Texas Commission on Environmental Quality (TCEQ) for an Air Quality Standard Permit, Registration No. 148706L004, which would authorize construction of two temporary concrete batch plants located at 8960 Farm-to-Market 2034, Robert Lee, Coke County, Texas 79739. This application is being processed in an expedited manner, as allowed by the commission's rules in 30 Texas Administrative Code, Chapter 101, Subchapter J. This link to an electronic map of the site or facility's general location is provided as a public courtesy and not part of the application or notice. For exact location, refer to application. <http://www.tceq.texas.gov/assets/public/hb610/index.html?lat=31.87342&lng=-100.53221&zoom=13&type=r>. The proposed facility will emit the following air contaminants: particulate matter including (but not limited to) aggregate, cement, road dust, and particulate matter with diameters of 10 microns or less and 2.5 microns or less.

This application was submitted to the TCEQ on June 17, 2019. The executive director has completed the administrative and technical reviews of the application and determined that the application meets all of the requirements of a standard permit authorized by 30 TAC 116.611, which would establish the conditions under which the plant must operate. The executive director has made a preliminary decision to issue the registration because it meets all applicable rules. The application, executive director's preliminary decision, and standard permit will be available for viewing and copying at the TCEQ central office, the TCEQ San Angelo regional office, and at the Coke County Courthouse, 13 East 17th Street, Robert Lee, Coke County, Texas, beginning the first day of publication of this notice. The facility's compliance file, if any exists, is available for public review at the TCEQ San Angelo Regional Office, 622 South Oakes, Suite K, San Angelo, Texas. Visit www.tceq.texas.gov/goto/cbp to review the standard permit.

Public Comment/Public Meeting. You may submit public comments or request a public meeting. See **Contacts section.** The TCEQ will consider all public comments in developing a final decision on the application. **The deadline to submit public comments or meeting**

requests is 30 days after newspaper notice is published. Issues such as property values, noise, traffic safety, and zoning are outside of the TCEQ's jurisdiction to consider in the permit process.

The purpose of a public meeting is to provide the opportunity to submit comments or ask questions about the application. A public meeting will be held if the executive director determines that there is a significant degree of public interest in the application or if requested by a local legislator. A public meeting is not a contested case hearing. If a public meeting is held, the deadline to submit public comments is extended to the end of the public meeting.

Contested Case Hearing. You may request a contested case hearing. A contested case hearing is a legal proceeding similar to a civil trial in state district court. **Unless a written request for a contested case hearing is filed within 30 days from this notice, the executive director may approve the application.**

A person who may be affected by emissions of air contaminants from the facility is entitled to request a hearing. To request a hearing, a person must actually reside in a permanent residence within 440 yards of the proposed plant. If requesting a contested case hearing, you must submit the following: (1) your name (or for a group or association, an official representative), mailing address, daytime phone number; (2) applicant's name and registration number; (3) the statement "[I/we] request a contested case hearing;" (4) a specific description of how you would be adversely affected by the application and air emissions from the facility in a way not common to the general public; (5) the location and distance of your property relative to the facility; (6) a description of how you use the property which may be impacted by the facility; and (7) a list of all disputed issues of fact that you submit during the comment period. If the request is made by a group or association, one or more members who have standing to request a hearing must be identified by name and physical address. The interests which the group or association seeks to protect must be identified. You may submit your proposed adjustments to the application which would satisfy your concerns. See **Contacts section.**

TCEQ Action. After the deadline for public comments, the executive director will consider the comments and prepare a response to all relevant and material, or significant public comments. The executive director's decision

on the application, and any response to comments, will be mailed to all persons on the mailing list. If no timely contested case hearing requests are received, or if all hearing requests are withdrawn, the executive director may issue final approval of the application. If all timely hearing requests are not withdrawn, the executive director will not issue final approval of the permit and will forward the application and requests to the Commissioners for their consideration at a scheduled commission meeting. The Commission may only grant a request for a contested case hearing on issues the requestor submitted in their timely comments that were not subsequently withdrawn. **If a hearing is granted, the subject of a hearing will be limited to disputed issues of fact or mixed questions of fact and law relating to relevant and material air quality concerns submitted during the comment period.** Issues such as property values, noise, traffic safety, and zoning are outside of the Commission's jurisdiction to address in this

proceeding.

Mailing List. You may ask to be placed on a mailing list to receive additional information on this specific application. See **Contacts section.**

Information Available Online. For details about the status of the application, visit the Commissioners' Integrated Database (CID) at www.tceq.texas.gov/goto/cid. Once you have access to the CID using the link, enter the registration number at the top of this notice.

Contacts. Public comments and requests must be submitted either electronically at www14.tceq.texas.gov/epic/eComment/, or in writing to the Texas Commission on Environmental Quality, Office of the Chief Clerk, MC-105, P.O. Box 13087, Austin, Texas 78711-3087. Please be aware that any contact information you provide, including your name, phone number, email address and physical address will become part of the agency's public record. For more information about this application or the permitting process, please call the TCEQ

Public Education Program toll free at 1-800-687-4040 or visit their website at www.tceq.texas.gov/goto/pep. Si desea información en Español, puede llamar al 1-800-687-4040.

Further information may also be obtained from Concrete Mobility, LLC, 1207 Cardinal Avenue North, Glencoe, Minnesota 55336-3365 or by calling Ms. Amber Flood, Office Administration at (320) 864-3741.

Notice Issuance Date: July 24, 2019.

...Texas VSV Update

(Continued from page 5)

Strategies for Preventing VSV Even with the best defensive measures, VSV could infect a herd. However, these tips may help protect livestock: 1. Control biting flies 2. Keep equine animals stalled or under a roof at night to reduce exposure to flies 3. Keep stalls clean 4. Feed and water stock from their individual buckets 5. Don't visit a ranch that's under quarantine for VSV. Wait until the animals have healed For more information about VSV visit https://www.tahc.texas.gov/news/brochures/TAHCBrochure_VS.pdf.

Water Weekly

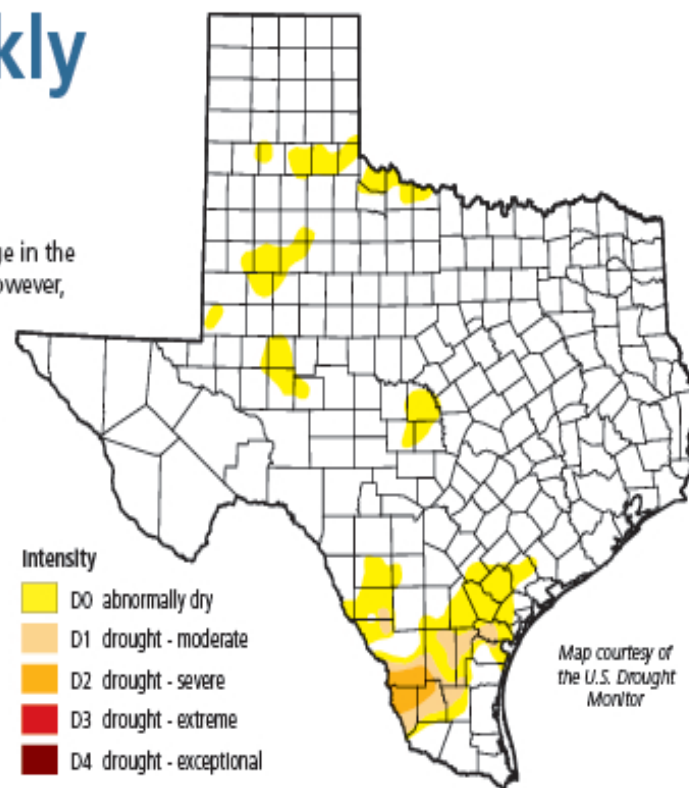

For the week of 07/29/19

Water conditions

The latest drought map shows little change in the area of the state impacted by drought. However, abnormally dry areas, which could transition to drought in the next few weeks, have grown 3 percentage points in the last week and now cover 8 percent of the state.

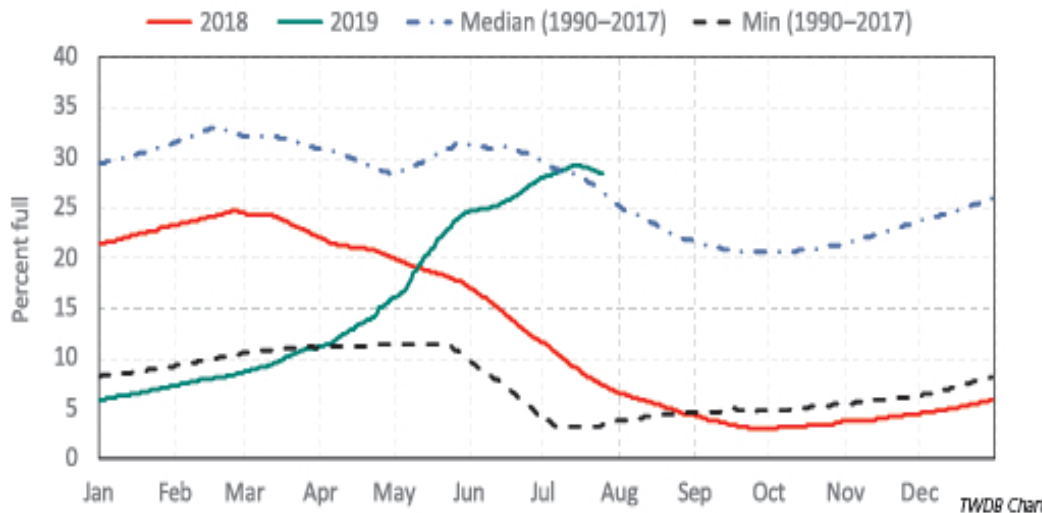

Drought conditions

- ◆ 2% now
- ◆ 2% a week ago
- ◆ 1% three months ago
- ◆ 50% a year ago

Elephant Butte Reservoir storage hydrograph

Elephant Butte Reservoir, a water supply for El Paso, was less than 3 percent full in September 2018. Meltwater from abundant snow in the upper watershed in winter 2018-2019 has brought the reservoir up to almost 30 percent full in July 2019.

Written by Dr. Mark Wentzel — Dr. Mark Wentzel is a hydrologist in the TWDB's Office of Water Science and Conservation.
