Blackwell High School office now open for schedule selections

The Blackwell High School office is open for class schedule selections from 8 am to 3 pm Monday through Friday.

The Texas Legislature made changes to graduation plans for Texas high school students. The new plan then required many modifications that occurred throughout the past school year, and some changes still occurred during the month of June. Hopefully, the modifications to the new graduation plan are complete and we are ready to make schedules for the 2014-15 school year. Freshman students are required to graduate under this plan, but Sophomores, Juniors, and Seniors may choose to remain under the previous graduation plan or move to the new plan. The new plan does offer greater flexibility for the student in choosing courses.

Students/parents can call or come by the office between 8:00 and 3:00 Monday-Friday to discuss graduation plan options and choose courses.

Fall Gardening Tips

Submitted by Morgan Runyan
Texas AgriLife Agent

So you want to grow garden fresh vegetables this fall. Where do you start? Simply looking at seed packets in catalogs or local nurseries will not get the job done. One must garden smartly if economical production and utilization are expected. Here are some quick tips to get your fall garden started.

- Remove all plants in the garden that have matured and are no longer producing. Leave okra, cherry tomatoes, and pole beans if the foliage is healthy. Don't try to compost insect and disease-ridden plants--spider mites don't compost!

- Make sure your garden placement is in "Full" sun. That means at least 8 hours of intense, direct exposure. Shade after 3pm is wonderful; shade in the morning is acceptable.

- Prepare your garden beds by tilling the soil, adding your slow release fertilizer or manure, and pre-irrigate the entire garden area by wetting with a sprinkler.

- Tomatoes and peppers are easier to grow as transplants. Transplants WILL survive hot temperatures and full sun IF adequate moisture is available to the plant. Provide adequate, daily moisture to allow for root system establishment. Fall-recommended tomato varieties such as Bingo, Merced and Celebrity can be purchased in a large transplant form with larger root systems in mid to late August. Surefire and Heatwave are the only tomato varieties which will set flowers and fruit during the heat of September and are thus the earliest maturing tomatoes of a fall planting. The best bell pepper, Summer Sweet 860, is also available in local nurseries

- Plant long-term, frost-tolerant vegetables together. Frost-tolerant vegetables include beets, broccoli, Brussels sprouts,

RLCC Celebration! Robert Lee Care Center residents enjoyed the 4th of July party and dance with music provided by Rough Creek. Refreshments served were lemonade and watermelon.

cabbage, carrots, cauliflower, chard, collards, garlic, kale, lettuce, mustard, onions, parsley, spinach and turnips.

- Plant short-term, frost-susceptible vegetables together so that they can be removed after being killed by frost. Frost protection and the planting of a cereal rye cover crop are facilitated if such a grouping system is used. Frost-susceptible vegetables include beans, cantaloupes, corn, cucumbers, eggplants, okra, peas, peppers, Irish potatoes, sweet potatoes, squash, tomatoes and watermelons.

- Keep in mind the relative maturity rate, average height (in feet) and frost sensitivity of the crop of various garden vegetables with FS meaning frost-susceptible crops which will be killed or injured by temperatures below 32 degrees F. and FT meaning frost-tolerant crops which can withstand temperatures below 32 degrees F.

- The quick (30-60 days) maturing vegetables are: beets (1 1/2 feet) FT; bush beans (1 1/2 feet) FS; leaf lettuce (1 foot) FT; mustard (1 1/2 feet) FT; radishes (1 1/2 feet) FT; spinach (1 foot) FT; summer squash (3 feet) FS; turnips (1 1/2 feet) FT; and turnip greens (1 1/2 feet) FT.

- The moderate (60-80 days) maturing vegetables are: broccoli (3 feet) FT; Chinese cabbage (1 1/2 feet) FT; carrots (1 foot) FT; cucumbers (1 foot) FS; corn (6 feet) FS; green onions (1 1/2 feet) FT; kohlrabi (1 1/2 feet)

FT; lima bush beans (1 1/2 feet) FS; okra (6 feet) FS; parsley (1 1/2 feet) FT; peppers (3 feet) FS; and cherry tomatoes (4 feet) FS.

- The slow (80 days or more) maturing vegetables are: Brussels sprouts (2 feet) FT; bulb onions (1 1/2 feet) FT; cabbage (1 1/2 feet) FT; cantaloupes (1 foot) FS; cauliflower (3 feet) FT; eggplant (3 feet) FS; garlic (1 foot) FT; Irish potatoes (2 feet) FS; pumpkins (2 feet) FS; sweet potatoes (2 feet) FS; tomatoes (4 feet) FS; watermelon (1 foot) FS; and winter squash (1 foot) FS.
