Connect to Energy Savings

AS THE ELECTRIC DELIVERY COMPANY that has been serving south and west Texas for nearly 100 years, AEP Texas knows a thing or two about energy conservation. While we don't sell electricity or send out monthly bills, we recognize what hot weather does to electricity usage and the resulting bills.

Since AEP Texas and the 1,700 AEP employees in Texas are directly connected to the many communities where we live and serve, we'd like to share some low or no cost tips on how to keep cooler this summer, while saving valuable energy and money.

- Set air-conditioning thermostats to the highest possible comfortable setting and dress accordingly.
- Turn off every appliance you are not using including lights, televisions and radios. Use the "sleep" feature on your computer equipment.
- Only cool rooms that you use. Close vents and doors in unused rooms. Be sure to close closet doors.
- Check your air-conditioning filter every month and replace as needed.
- Keep windows that let the sun in covered when the sun is shining on them.
- Weather strip and caulk around windows and doors to prevent drafts.
- Close your fireplace damper when the fireplace is not being used.
- Use fans to help circulate the air in your house.
- Air-dry dishes in the dishwasher.
- Lower the temperature on your hot water heater during the summer, take shorter showers and wash only full loads in the laundry and dishwasher.

It's important to remember that if you're having trouble paying your electric bill, call your retail energy provider (REP) at the number listed on your current electric bill to avoid disconnection.
