Female farmers and ranchers in Texas continues to increase

By Gary Joiner

Publisher, Texas Farm Bureau
The most recent Census of Agriculture counted 408,000 farmers and ranchers in Texas.

Of that amount in 2017, just over 156,000, or 38%, were female farmers and ranchers.

That's an increase of five percentage points from 2012.

I'm not surprised by the higher number. I suspect the next Census of Agriculture in 2022 will reflect an even greater number of female farmers and ranchers in our state.

The vast majority of female Texas producers have more than 10 years of experience on the farm and ranch.

More than half of female farmers and ranchers in our state are active in beef cattle production.

Texas leads the nation in the number of female farmers and ranchers.

They're part of an agricultural engine that feeds the world and propels our Texas economy.

On This Day in Texas History September 3, 1895

On this day in 1895, William Carrol Crawford, the last surviving signer of the Texas Declaration of Independence, died while visiting his son in Erath County. Crawford, a native of North Carolina, moved to Texas in 1835 and settled near Shelbyville. He and Sydney O. Pennington represented Shelby County at the Convention of 1836, which wrote the Declaration of Independence and the Constitution of the Republic of Texas and established the ad interim government.
